Education

Ph.D. Candidate in Economics

University of California, San Diego

2021–2027 (expected)

Advisor: Marc Muendler

M.S. in Economic Analysis

University of Chile

2017–2018

B.A. in Economics

University of Chile

2012–2016

Research Interests

Fields: Macroeconomics and Trade

Selected Topics: Production networks, global value chains, firm dynamics, economic growth, international trade, spatial economics, and applied econometrics

Job Market Paper

Multiproduct Firm Growth and Production Networks

with Marco Rojas

Using the universe of firm-to-firm transactions in Chile, we show that product and customer scope are complementary margins of firm size. A 10% increase in buyers is associated with 0.2 additional product introductions, conditional on intrinsic firm characteristics. We develop a model in which firm-level product adoption costs are amortized across buyer relationships, so expansion along one margin raises the return to expanding the other. Buyer-specific product matching allows firms to sell different subsets of their portfolios to different customers and reproduces the partial alignment between firm- and link-level product importance observed in the data. The calibrated model implies substantial cross-margin spillovers: halving buyer-relationship costs raises median product scope by 11%, while halving product-adoption costs raises median buyer reach by 17%. Customer scope is especially important for the firm-size distribution: shutting down the buyer margin reduces the dispersion of log sales by 37%, compared with 10% when the product margin is shut down.

Work in Progress

Trade Credit, Liquidity, and Network Contagion: Evidence from Transaction-Level Data

with Levent Altinoglu and Patricio Toro

Using transaction-level data on the universe of firm-to-firm sales in Chile, we study how trade credit shapes the propagation of shocks through production networks. We show that financial shocks transmit upstream through trade-credit relationships, reallocating liquidity across firms, while demand shocks do not meaningfully alter trade-credit contracts. Because payment terms are sticky, adjustment occurs primarily through substitution across suppliers rather than renegotiation within existing relationships, temporarily reshaping the production network.

Research Experience

Research Assistant 2023–Present

Core Member, Globalization and Prosperity Lab
University of California, San Diego

Visiting PhD Candidate 2021–2023

Financial and Monetary Policy Department
Central Bank of Chile

Research Assistant 2018–2021

Financial Policy Department
Central Bank of Chile

Professional Experience

Financial Economic Analyst 2018–2021

Financial Policy Department
Central Bank of Chile

Professional Internship 2016–2017

National Productivity Commission of Chile
Ministry of Economy, Development, and Tourism of Chile

Teaching Experience

Associate Instructor – ECON 3 2026
University of California, San Diego

Teaching Assistant 2022–2026
University of California, San Diego

Lecturer – Advanced Time Series (Master's Program, EST724-01) 2020–2021
Statistics Institute, Pontifical Catholic University of Valparaíso

Teaching Assistant 2015–2019
University of Chile

Awards, Scholarships, and Grants

Advancement to Candidacy Fellowship

University of California, San Diego

2024

Graduate Research Fellowship

University of California, San Diego

2022–2023

Regents Fellowship

University of California, San Diego

2021–2022

Seminars, Conferences, and Workshops

2026: LACEA-LAMES (*scheduled*)

2026: CESifo Junior Workshop on International Economics

2019: Central Bank of Chile Seminar

2019: Chilean Economic Society (SECHI)

Computer Skills

Stata, MATLAB, Python, Julia, SQL, R, $\text{\LaTeX}$, Microsoft Office

Languages

Spanish (native), English (fluent)

Additional Information

Nationality: Chilean
